FCC MAIL ROOM

NORTHERN CALIFORNIA NPSPAC REGION 6

REVIEW AND REVISION COMMITTEE

90-287

February 26, 1998

Secretary
Federal Communications Commission
1919 "M" Street NW, Room 222
Washington DC 20554

On December 11, 1997 a meeting of the Review and Revision committee was convened at 10:00 am for the purpose of making modifications to the Channel allocations and allotments of the Region. Preceding this meeting formal notification was made to all existing licensees and all others who had indicated an interest in applying for licenses in this spectrum. In addition, notices were placed in the monthly meeting notices of the Northern California Chapter of APCO and mailed to over 400 recipients. 45 days was given to submit formal requests to the Chairman and the date for this meeting was set for 15 days following,

Requests were received from the Bay Area Rapid Transit District, UC Berkeley, City of Oakland, Santa Clara County, Alameda County, Redwood City, City of Lodi and City of Campbell. It was anticipated that there would be considerable difficulties in meeting all requests, as the channels in the San Francisco Bay area were virtually all assigned and licensed.

Following an excellent exchange of information and participation by representatives of all the applicants and several of the existing licensees, all requests were satisfied. This required some exchange of several channels previously allocated to others and the use of some channels which were allotted for use in specific counties. The decisions were unanimously approved by all parties.

The enclosed Attachment G reflects the changes in the Channel Assignments.

It was decided to postpone submission of this request for approval until after the monthly meeting in January in order to fill vacancies in the Committee membership and elect the Chair. The enclosed Attachment D reflects these changes.

Accordingly, the Review and Revision Committee respectfully requests your approval of the modifications as submitted. We believe this to be a minor modification, as the changes are of a lesser degree and were approved by all concerned. This is reflected in the attached minutes of the meeting.

Sincerely,

Art McDole, Chairman, Review and Revision Committee

cc: Ms. Kathryn Hosford, Public Safety Liaison

800 MHz Region 6 Review and Revision Committee Plan Modification Meeting

Santa Rita, California, December 11, 1998

Meeting convened at 10000 hours on 11 December, 1997 at the Alameda County Office of Emergency Services conference room in Santa Rita

Self introduction of all persons present were made. A quorum of the Review and Revision Committee was established with ten members present.

Discussion was held on the City of Roseville request to use channels allotted to Placer County, which is within that county. The city has issued a contract for the installation of an 800 MHz system, but have not applied for licensing. The City presented contour maps and supporting information for sites at the police station and the "Penryn site". Mr. McDole proposed allocating the channels 694, 750, 788, 806 and 821. The Committee further recommended the City use the "CLEMARS" channel at the Penryn site to provide communications for units conducting business at the county jail and courthouse in the Auburn area. After reviewing the contour maps for the proposed sites the Committee requested the City to investigate methods of reducing the amount of signal being transmitted toward the west from the police station site. Mr. Root made a motion, seconded by Mr. Engstrom to approve the allocation of the five channels noted above. Passed unanimously.

Discussion was held on the City of Richmond request to retain the channels previously allocated but not installed. They are making progress toward obtaining funding for the project but do not have a firm commitment. Mr. Engstrom moved, seconded by Mr. Costa to allow the City of Richmond until March 1, 1998, to secure the funding for their system or lose their allocation for the channels currently licensed. Passed unanimously.

Discussion was held on the City/County of San Francisco request for additional channels. Their request for additional channels was tabled pending review of other requests in the Bay area.

Discussion was held on the University of California at Berkeley request for one additional channel. Their request was tabled pending review of other requests in the Bay area.

Discussion was held on the Alameda County request for additional channels. Mr. Root moved, seconded by Mr. Costa to allow Alameda County to convert channels 661, 687, 727 and 825 to high level use. Passed unanimously (Secretary's note: This action was modified by later actions).

Discussion was held on the City of Oakland request for additional channels. Their request was tabled pending review of the other requests in the Bay area..

Discussion was held on the Bay Area Rapid Transit District (BARTD) request for additional channels. Their request was tabled pending review of other requests in the Bay area.

A general discussion was then held involving recommendations made by Mr. McDole and the tabled requests in an effort to satisfy all expressed needs. After extensive discussion with input from virtually all present, the following changes recommended:

BARTD	delete their allocation on channels 629,734, and 827 add allocations on channels 668,733 and 737 Note: remove allotment Regional a on channel 668 and remove allotment Nor CA Fed-Local Coordination Channel on channel 736 and the associated "guard" channels on 735 and 737.
UC Berkeley	add allocation of Channel 681
City of Oakland	add allocation on Channels 629 and 798
San Bruno	add allocation on Channel 701
Sutter County	delete their allotment on Channels 644 and 762 add allotments on Channels 649,674 and 761
Santa Clara County	add allotment on Channels 602,694, and 732 Note: Remove allotment Regional A on Channel 732 and the associated "guard" channel 733
San Mateo County	delete allotment on Channel 767 - add allotment on Channels 759 and 827
Alameda County	add allocations on Channels 754,767,769,780 and 808 add allocation for low-level use only on Channel 735 Note: Remove allotment Regional A on Channels 754, 780 and 808
Contra Costa County	delete allotment on Channel 629 add allotments on Channels 618, 628, 642, 650, 709, 744, 819 and 827 Note: Remove allotment Reserved EMS on Channel 650, as there has been no indication of interest from the EMS community

Secondary allotment of channels. In the event that either the City of Richmond or Contra Costa County will not be able to construct their planned systems the following secondary allotments were made

City and County of San Francisco	add allotment on Channels 607, 657, 683, 784 and 800
Alameda County	add allotment on Channels 723 and 771

Mr. Engstrom made a motion, second by Mr. Costa, to approve the entire above listed modifications. Passed unanimous.

The following allocations were made in accordance with the provisions of the Plan which provides for the use of an allotted channel by any qualified public safety agency within that county.

City of Redwood City Channel 627 - allotted to San Mateo County

Santa Clara Regional Hospital	allocation of Channel 704 - allotted to Santa Clara County
Santa Clara Water District	allocation of Channel 630 - allotted to Santa Clara County
City of Campbell	allocate Channel 658 - allotted to Santa Clara County
City of San Bruno	allocate Channel 701 - allotted to San Mateo County
City of Lodi	allocate Channel 701 - allotted to San Joaquin County
Central Contra Costa Sanitation District	allocate Channel 764 - allotted to Contra Costa County
City of Vacaville	allocate Channel 764 - allotted to Solano County
City of San Jose	Allocate Channels 724 and 799 - allotted to Santa Clara County

All the above were unanimously approved by acclimation.

Chairman Art McDole thanked all members of the Review and Revision Committee for their excellent input and expressed his appreciation of the cooperative actions of all of the existing licensees and applicants.

The meeting was adjourned at 3:15 pm./

Glen Nash, Secretary pro-tem.
